

Welcome to the Kitchen Garden

All produce is harvested, weighed and donated to area food relief shelters. If you would like to be added to the list, contact the garden office for more information.

The focus of this garden is to display edible, medicinal and culinary plants. Additionally, the Kitchen Garden is a living classroom to educate all ages to the world of vegetables. If you would like a Tour, call the garden office for more information. Groups of 10 or more will be provided with a lesson plan on creating your own gardens as well as sampling some of the various produce, herbs and more.

Though not advised, the plants in the display have edible properties if prepared properly. Do not eat or consume the plants in the garden. Thank you!
